

NOTICE OF WEBSITE, AND OF ANNOTATED MEMOIR ("ADDITIONAL MATERIALS")

It is hereby noticed that I (the Complainant, Walter Tuvell) own/maintain a **website** devoted to Judicial Misconduct: <http://JudicialMisconduct.US>.

One whole webpage on that website is devoted to the case of *Ryan v. U.S.*: [http://JudicialMisconduct.US/CaseStudies/RyANvUS\(ALSCHULERvEASTERBROOK\)](http://JudicialMisconduct.US/CaseStudies/RyANvUS(ALSCHULERvEASTERBROOK)).

That webpage holds (and also links to publicly accessible online copies of) Prof. Albert Alschuler's "notorious" law review article (which he styles as a **Memoir**), *How Frank Easterbrook Kept George Ryan in Prison*.

The webpage also holds a copy of our newly produced **annotated** version, which we call **Memoir Annotated ("MemAnn")**: <http://JudicialMisconduct.US/sites/default/files/2018-05/MemoirAnnotated.pdf>. As a sample of MemAnn, its first page of text+annotations is attached hereto, *infra*.

THESE ONLINE RESOURCES (WEBSITE, WEBPAGE, MemAnn DOCUMENT) ARE HEREBY SUBMITTED AS INTEGRAL COMPONENTS OF OUR JUDICIAL MISCONDUCT PROCEEDINGS AGAINST JUDGES EASTERBROOK AND WOOD (and potentially others in future)

It is expected that the submission of these "additional materials" (in the sense of Judicial Misconduct Complaints) in "**electronic**" form is wholly acceptable to the Court, in this day-and-age.[†] Especially, we note that MemAnn is a **PDF (Portable Document Format)** document, which is equipped with "**live**"/**clickable links (esp. for its legal citations/references)**, thus making study/research/checking of the document much easier. Nonetheless, *should* the Court decide for some reason that it desires an off-line copy (thumbdrive, paper hardcopy, whatever), Complainant hereby declares his willingness to submit/provide that, upon request/order/demand.

[†] • As a typical online/dynamic/"live" (as opposed to offline/static/"dead") document, MemAnn is (desirably) subject to ongoing revision/bug-fixing. Such modified versions are intended only to make the document "bigger/better/faster/stronger," in minor/trivial ways (such as repairing typographical errors, or making the wording more euphonious) — *not* to "sneak additional substantive materials" into it. This should be acceptable to the Court, for at least two reasons: (i) the Court can always make its own offline "snapshots" if it doesn't like the online nature of MemAnn; (ii) the "really important" primary/substantive content of MemAnn is the underlying Memoir itself (not the annotations we have added/supplied, which is merely secondary/editorial in nature), and the underlying Memoir itself is of course constant/never-changing.

Alschuler is genteel enough here (and elsewhere) to use euphemisms like "concoct" — but we all know the right word is "BULLSHIT" ("B.S." and by a pompous ass, no less)

I. INTRODUCTION

This Memoir tells the story of my unsuccessful representation of former Illinois Governor George H. Ryan in the U.S. Court of Appeals for

* Julius Kreeger Professor Emeritus of Law and Criminology, the University of Chicago.

A • The instant PDF¹ document is strongly associated with — and meant to be read in conjunction/coordination/conjunction/consultation with — the webpage <http://judicialmisconduct.us/CaseStudies/RYANvUSvAISCHULERvEASTERBROOK>. It is equipped with "live/active" hyperlinks, and is intended to be viewed in "2-up" mode (side-by-side-pages) — like this:

α • PDF (Portable Document Format (<https://en.wikipedia.org/wiki/PDF>), with "PDF annotations," The annotations (and images) have the unfortunate side-effect of bloating the size of the document (from ~2MB to ~44MB). This document itself is "text-enabled" (as opposed to "image-only"), hence text-searching is possible in the document. However, some PDF readers (depending on their functionality feature-list, depending on such things as browser-embedded or full-feature-standalone application) may have difficulty viewing the annotations, or printing them, or searching the text in them, Your mileage may vary (you may want to try various PDF readers). (Yes, we could generate a pre-configured 2-up PDF document, but that's inefficient/redundant, as all known PDF readers already natively support the functionality view a 1-up PDF in 2-up mode anyway)
